Installing an application for managing Gemalto.NET token

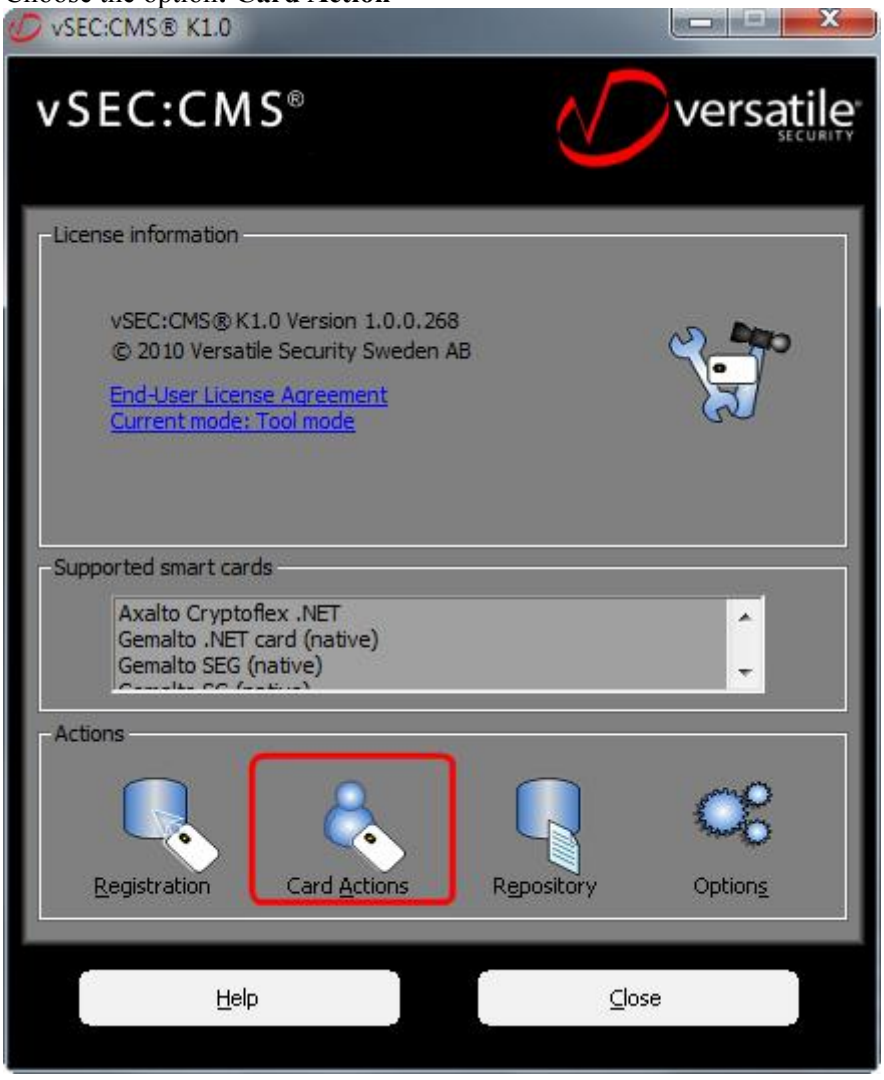
To import the certificate of Gemalto.NET token, first you should install the appropriate drivers depending on your operating system. The drivers can be downloaded from the following location: https://aukcijaatc.mepso.com.mk/PublicPage/Help.aspx

Then install the application for managing of Gemalto.NET token, and it can be downloaded from the following location:
https://aukcijaatc.mepso.com.mk/Downloads/vSEC_CMS_K1.0.exe

Importing a certificate of the token

1. Put the token in the computer and launch the application vSEC:CMS

2. Choose the option**: Card Action**



3. Choose tab Passcode where you can change PIN code of the token

4. In the appropriate fields entered the old PIN (0000) and PIN for the company that you have in excel document.
